MOHAMMED MUBEEN AHMED

Course : **B.Tech**, Electronics & Communication Engineering, 2025

Email : 21311A04BA@sreenidhi.edu.in

Mobile : 8688265765

CGPA : 7.55

ACADEMIC DETAILS

COURSE	INSTITUTE/COLLEGE	BOARD/UNIVERSITY	SCORE	YEAR
CLASS XII	SRI CHAITANYA JUNIOR COLLEGE	Telangana Board of Intermediate Education (TSBIE)	886 MARKS	2021
CLASS X	NOBLE HIGH SCHOOL	Telangana Board of Secondary Education (SSC)	9.2 CGPA	2019

Subjects / Electives	Python, Embedded C programming, Data base management,Java, Advance computer Architecture, ESD, OS, ERTOS
Technical Proficiency	Embedded Systems, DBMS, Python, C Programming, C++ Language, Data Structures, Java

SUMMER INTERNSHIP / WORK EXPERIENCE

Intern, Palo Alto Networks **Apr 2024 - May 2024**

Cybersecurity Virtual internship

Internship , Juniper Networks **Jan 2024 - Mar 2024**

Juniper networks

Cloud computing virtual internship

Internship , microchip **Sep 2023 - Nov 2023**

Embedded developer virtual internship

PROJECTS

AUTOMATIC WATER PUMP SWITCHER USING 555 TIMER IC - IC APPLICATIONS **Jun 2024 - Aug 2024**

In many Places time for water supply is not fixed. It may be in early morning hours or anytime in a whole day. These creates many problems for a concerned person you have to wake up early, just to switch on your motor pump and wait till your water tank is filled up.
So, Here we have designed a simple idea which simply turns on or off your pump according to your water supply. The controller system works on a 555 IC with a water-level sensing arrangement. So whenever the incoming water is sensed the relay circuit simply switches the Pump On and when the water supply is off the relay switches off the motor.
Hence This is a simple and a low-cost automatic water pump motor controller which makes your everyday water pump related problem quite easy.

CYBER SECURITY (DATA ENCRYPTION, EMAIL SPOOFING) - NETWORK SECURITY **Apr 2024 - May 2024**

Data Decryption:(USING LINUX SOFTWARE)

Data decryption is like taking a secret coded message and using a special key to turn it back into its original, understandable form. Imagine you received a message that looks like a bunch of random letters and numbers – that's the encrypted data. To make sense of it, you need a specific key that matches the one used to encrypt the message.

Email spoofing:

Email spoofing is a deceptive technique used by malicious actors to forge the sender's address in an email to make it appear as if it's coming from a trusted source. Essentially, it involves manipulating the email header information to trick the recipient into believing the message is legitimate

Design of Calculator using aurdino - Embedded systems **Sep 2023 - Nov 2023**

Here we Designed a Calculator using Aurdino in Tinkercad Software
